Board of Directors Message.

We at **Taawon Pan Gulf (TPG)** believe that the great things in life are rarely accomplished alone. It takes teamwork to build something beautiful, strong, and enduring.

Our role is to successfully deliver the client's vision into reality using our history of experience, vast resources, and dedicated team members.

This is our passion and the foundation as we continue to evolve with new strategies and technical mastery, maintaining our position at the forefront of our industry. Together, we will build a legacy tomorrow for the community and nation.

Saudi Arabia Vision 2030.

Taawon Pan Gulf (TPG) believes in and is committed to Saudi Arabia's Vision 2030. It was launched under the leadership of the custodians of the two Holy Mosques, King Salman Bin Abdulaziz Al Saud and HRH Prince Mohammed Bin Salman bin Abdulaziz Al Saud.

Taawon Pan Gulf (TPG) will utilize all our resources and experience to partner in the realization of Vision Realization Programs (VRPs) related to Vision 2030 for Saudi Arabia, focusing on construction, infrastructure, and fit-out contracting. We will also participate in all Giga-projects associated with Vision 2030 to stimulate the economy. Given their sheer scale, the benefits of these projects are expected to expand significantly beyond the real estate and infrastructure sectors, helping diversify the Saudi economy away from oil.

Mission of Taawon Pan Gulf (TPG)

Our mission is to build a better future for society by delivering world-class construction services through Innovative machinery and professional Manpower, actively partnering with private and government entities in all types of construction business sectors and maintaining the highest standards of ethics and social responsibility.

Vision of Taawon Pan Gulf (TPG)

Our vision is to be a strong and trusted partner in the successful development efforts and plans in the Kingdom of Saudi Arabia and expand our operations to the GCC and Middle East regions.

Taawon Pan Gulf (TPG)

We are a leading international construction, infrastructure, fit-out contracting specialist and Specialized Contracting. This is because Taawun Pan Gulf Contracting Company (TPG) founders have more than 20 years of experience in the Construction sector. We embrace and embody our core values of excellence, integrity, and innovation in every aspect of our work.

Taawon Pan Gulf (TPG)

We believe in building and maintaining close relationships with our clients. Our primary objective is to ensure client satisfaction through our highly qualified and committed professional management team, based in our Saudi Arabian head office in Riyadh and our regional office in the United Arab Emirates (UAE).

Taawon Pan Gulf (TPG)

We have honed our expertise and gained indispensable insights that enable us to tackle complex challenges and maintain our standard of exceptional results. Our forward-thinking approach sets us apart as a trusted partner in the construction industry. By continuously pushing the boundaries of innovation, we strive to pioneer the future of construction, creating sustainable and impactful solutions that leave a lasting legacy.

Eastern Region.

More Than 20 Years Of Excellence In Business

Taawon Pan Gulf Contracting Co. (TPG)

**General Contracting
Segment**

Civil Infrastructure & Underground Utilities

- **Taawon Pan Gulf Co. (TPG)** specializes in the Civil Infrastructure & Underground Utilities scope of work. This scope is considered the main focus in all infrastructure and mega projects with an underground superstructural system.

Saudi Electricity Company (SEC).

- **Extra-High Voltage Substations**
- **High Voltage Substations**
- **Underground Cabling**

Saudi Electricity Company (SEC).

- **Taawon Pan Gulf Co. (TPG)** specializes in building Extra-High Voltage substations and High Voltage substations, including the scope of work for underground cabling

- These substations integrate seamlessly into national grids, industrial zones, and urban networks, ensuring efficient power transmission over long distances.
- Our substations also ensure safe and reliable power delivery for industries, businesses, and residential areas.

Saudi Electricity Company (SEC).

Institutional (Healthcare, Educational)

- **Taawon Pan Gulf Co. (TPG)** specializes in building Institutional (Healthcare, Educational, and Public) Projects, and we have an experienced team that understands our clients' needs because this type of project focuses on raising the standard and quality of life of citizens.

TPG Industrial Projects

- **Taawon Pan Gulf Co. (TPG)** specializes in industrial sector projects, covering all construction work scopes for these mega projects. We aim to deliver our industrial projects and meet our clients' needs through our experienced team.

- **Taawon Pan Gulf Co. (TPG)** adheres to all contractual obligations, regulatory requirements, and ISO 9001, 14001, and 45001 standards. We follow international engineering standards in all industrial sector projects to align with Saudi Vision 2030.

TPG Industrial Projects

Residential & Housing Sector Projects

- **Taawon Pan Gulf Co. (TPG)** specializes in building residential and housing projects. Our experienced team understands our clients' needs, as this project focuses on improving the quality of life across the entire Saudi kingdom.

- The government prioritizes this type of project to align with Saudi Vision 2030 and raise citizens' living standards, and increase the number of housing units to match market demand.

Residential & Housing Sector Projects

Commercial & Office Building Projects

- **Taawon Pan Gulf Co. (TPG)** specializes in building Commercial & Office Building projects. Our experienced team understands our clients' needs because this project focuses on mixed-use buildings, a type of project that exists across the entire Saudi kingdom.

- The government prioritizes this project to align with Saudi Vision 2030 and increase the number of office buildings to match market demand.

Commercial & Office Building Projects

High-Rise Building Projects

- **Taawon Pan Gulf Co. (TPG)** specializes in High-Rise building projects. Our experienced team understands our clients' needs, as this project focuses on mixed-use buildings, a type of project that exists throughout the entire Saudi Kingdom.

- The government prioritizes this project to align with Saudi Vision 2030 and increase the number of office and residential units to meet market demand.

High-Rise Building Projects

Sports Facility Projects

- **Taawon Pan Gulf Co. (TPG)** specializes in sports facility projects, covering all external and internal scopes of work in these mega projects. We aim to provide building users with a comfortable, safe, and efficient environment..

- **Taawon Pan Gulf Co. (TPG)** adheres to all contractual obligations, regulatory requirements, and ISO 9001, 14001, and 45001 standards. We follow international engineering standards in all sports facility projects to align with Saudi Vision 2030.

Sports Facility Projects

Hospitality Sector Projects

- **Taawon Pan Gulf Co. (TPG)** specializes in hospitality projects. Our experienced team understands our clients' needs, as this project focuses on mixed-use buildings, a type of project prevalent throughout the Saudi Kingdom.

- The government prioritizes this project to align with Saudi Vision 2030 and to increase the number of hospitality units so that they are ready before 2030, meeting the growing demand in the hospitality market.

Hospitality Sector Projects

Public Park and Outdoor Area Projects

- **Taawon Pan Gulf Co. (TPG)** specializes in public park and outdoor area projects. Our experienced team understands our clients' needs, as this project focuses on improving the quality of life across the Kingdom of Saudi Arabia.

- The government prioritizes this project to align with Saudi Vision 2030 and increases outdoor projects, landscape areas, and green areas to raise citizens' living standards in all of the kingdom's regions.

Public Park and Outdoor Area Projects

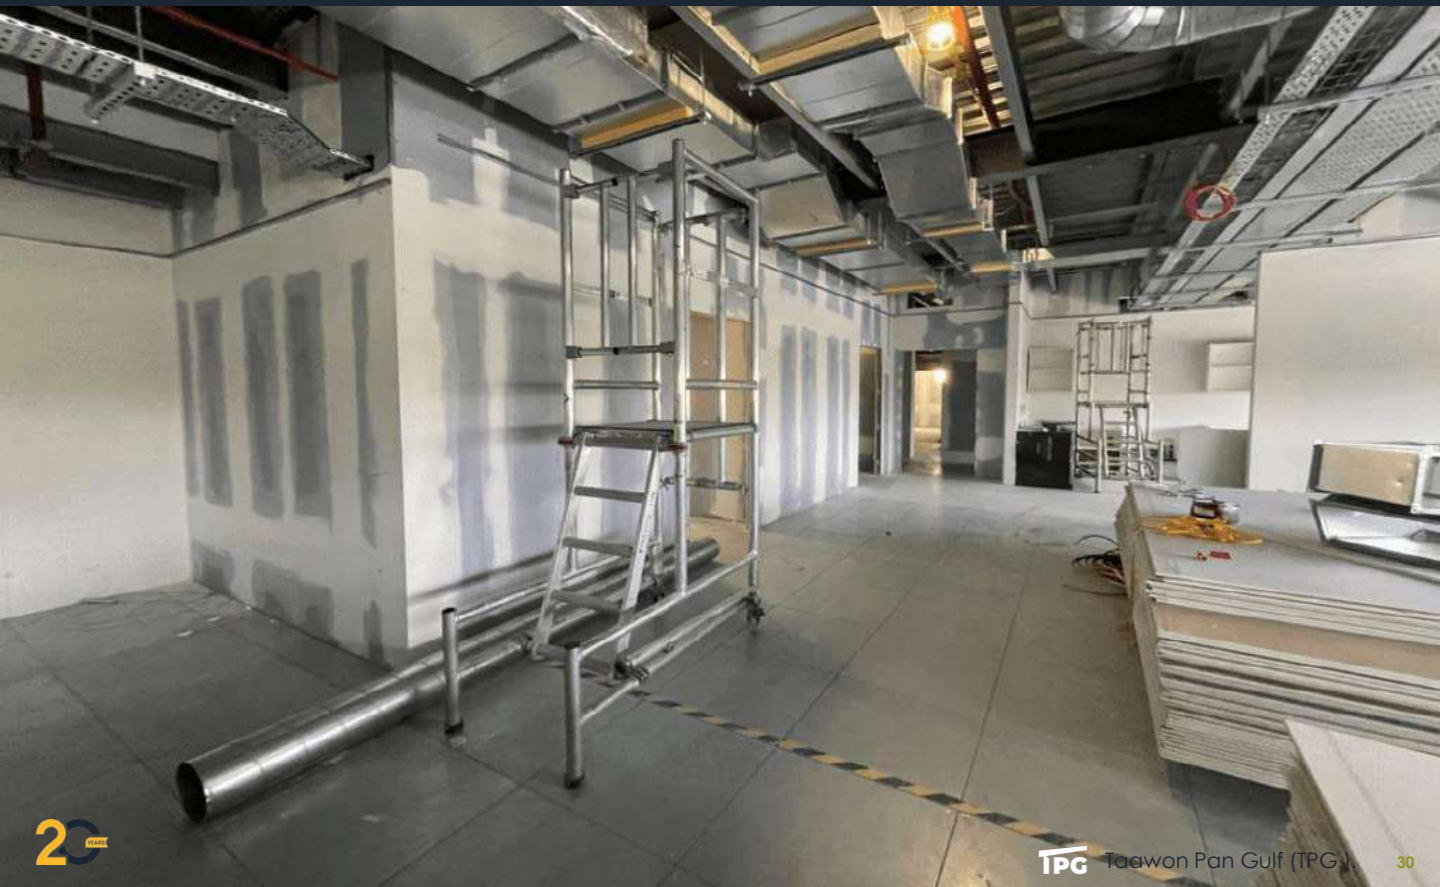

Fit-out Contracting Projects

- **Taawon Pan Gulf Co. (TPG)** specializes in fit-out contracting projects, which cover all types of finishing scopes of work in external and internal areas in the mega projects. We aim to provide building users with a comfortable, safe, and efficient environment.

- **Taawon Pan Gulf Co. (TPG)** adheres to all contractual obligations, regulatory requirements, and ISO 9001, 14001, and 45001 standards. We follow international engineering standards in all our fit-out contracting projects to align with Saudi Vision 2030.

Fit-out Contracting Projects

Electro-Mechanical Project (MEP)

- **Taawon Pan Gulf Co. (TPG)** specializes in electro-mechanical projects (MEP), which stands for mechanical, electrical, and plumbing scope of work. These are the three main types of systems that make up a building's infrastructure. MEP systems are designed to work together to provide a comfortable, safe, and efficient environment for building users.

- **Taawon Pan Gulf Co. (TPG)** adheres to all contractual obligations, regulatory requirements, and ISO 9001, 14001, and 45001 standards. We follow the international standards in all our electro-mechanical (MEP) projects to align with Saudi Vision 2030.

Taawon Pan Gulf Contracting Co. (TPG)

**Specialized Contracting
Segment**

Specialized Contracting Segment

Protective & Waterproof
System Segment.

IPG

Waterproof system

Waterproofing protects structures, building roofs, and Wet Areas against water infiltration, which can cause expensive and irreversible damage. It is primarily invisible after construction is completed. Every day, the basement of a building, or the outermost layer of a tunnel, is **exposed** to **intense** fluctuations in moisture levels and temperatures, all contributing to its deterioration.

High-performance Industrial & Protective and Waterproof liquid membrane system.

Concrete structures may be buildings, bridges, primary & secondary containments, and other reinforced concrete structures that need a protective coating against rain, natural air & pollution, aggressive marine environment conditions, and chemicals, Whether the purpose is to protect the new construction or refurbishment of the structures against aggressive influences, such as water ingress, atmospheric carbonation, and chloride ingress in the marine environment, or aggressive chemicals from degrading the structure, In the Saudi market, we have a wide range of High-performance Protective Coatings to give us the highest quality standards on durable and sustainable technology.

The choice of the right strategy, based on the primary users' needs and project requirements, can also significantly improve the overall performance of a project. There are so many types of a full system of waterproofing and High-performance Protective Coatings that can be utilized, but here is a brief list of typical applications and the main proposed materials and systems as below list:

Protective and Waterproof liquid membrane coating system

- Polysulfide Protection coating system
- A Non-toxic solvent-free epoxy Protection Coating System
- Amine-cured, pitch-free epoxy Protection Coating System
- High performance, A non-toxic Cementitious Protection and waterproof Coating.
- Aromatic Polyurethane liquid membrane for waterproofing
- Aliphatic hybrid polyurethane acrylic liquid waterproofing membrane
- Acrylic co-polymer protective waterproof coating
- Two-component Hybrid Polyurea – Pure Polyurea waterproofing membrane
- GRP Lining Protection and waterproof Coating System

Waterproofing Membrane System

- Bituminous Membrane (APP – SBS) Modified Waterproofing System
- PVC Membrane Waterproofing System
- TPO Membrane Waterproofing System
- FPO/TPO Membrane Waterproofing System
- HDPE Membrane Waterproofing System
- EPDM Membrane Waterproofing System

TPG Protective and Waterproof System Segment.

We are **Taawon Pan Gulf Co. (TPG)** a Specialized Contracting Company provides the latest technology, a full waterproofing system, and High-performance Protective Coatings to protect your project.

Specialized Contracting Segment

Heat Insulation
Protective & Waterproof
System Segment.

Heat Insulation, Protective and Waterproof system Segment Sector.

Thermal insulation is an essential technology for reducing energy consumption in buildings by preventing heat gain/loss through the building envelope. Thermal insulation material with low thermal conductivity (U-value) is often less than 0.1 W/mK. This will save energy, protect buildings, and provide comfortable heat zones for building users.

The choice of the right strategy, based on the primary users' needs and project requirements, can also significantly improve the overall performance of a project. There are so many types of Heat Insulation, Protective, and Waterproof systems that can be utilized, but here is a brief list of typical applications and the main proposed materials and systems as follows list

Heat Insulation, Protective, and Waterproof System

- Polyurethane Spray Foam – Full System

We are **Taawon Pan Gulf Co. (TPG)** a Specialized Contracting Company, which provides the latest technology and a full system for Heat Insulation, Protective and Waterproof systems to protect your project.

Specialized Contracting Segment

Performance Flooring
System Segment.

IPG

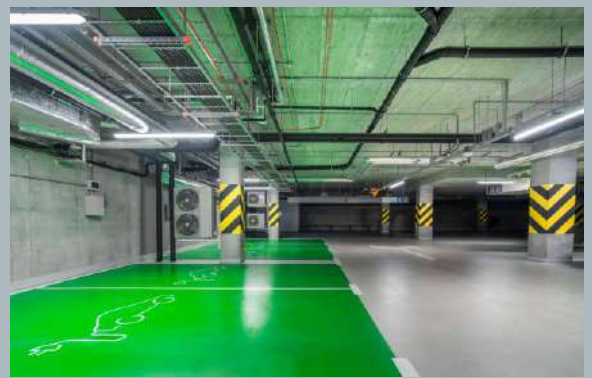

High-Performance Flooring coating system Segment Sector.

Floor coating systems for industrial facilities have the toughest job in the building. They must withstand constant traffic, mechanical wear, and abuse from corrosive liquid, high temperature, and heavy impact.

Their application can be used in almost all project types, including manufacturing, life science, warehouse, distribution industries, car parks, commercial buildings, institutional buildings, interior finishing, and carrier's industries.

The choice of the right strategy, based on the primary users' needs and project requirements, can also significantly improve the overall performance of a project. There are so many types of **Flooring coating systems** that can be utilized, but here is a brief list of typical applications and the main proposed materials and systems as below list:

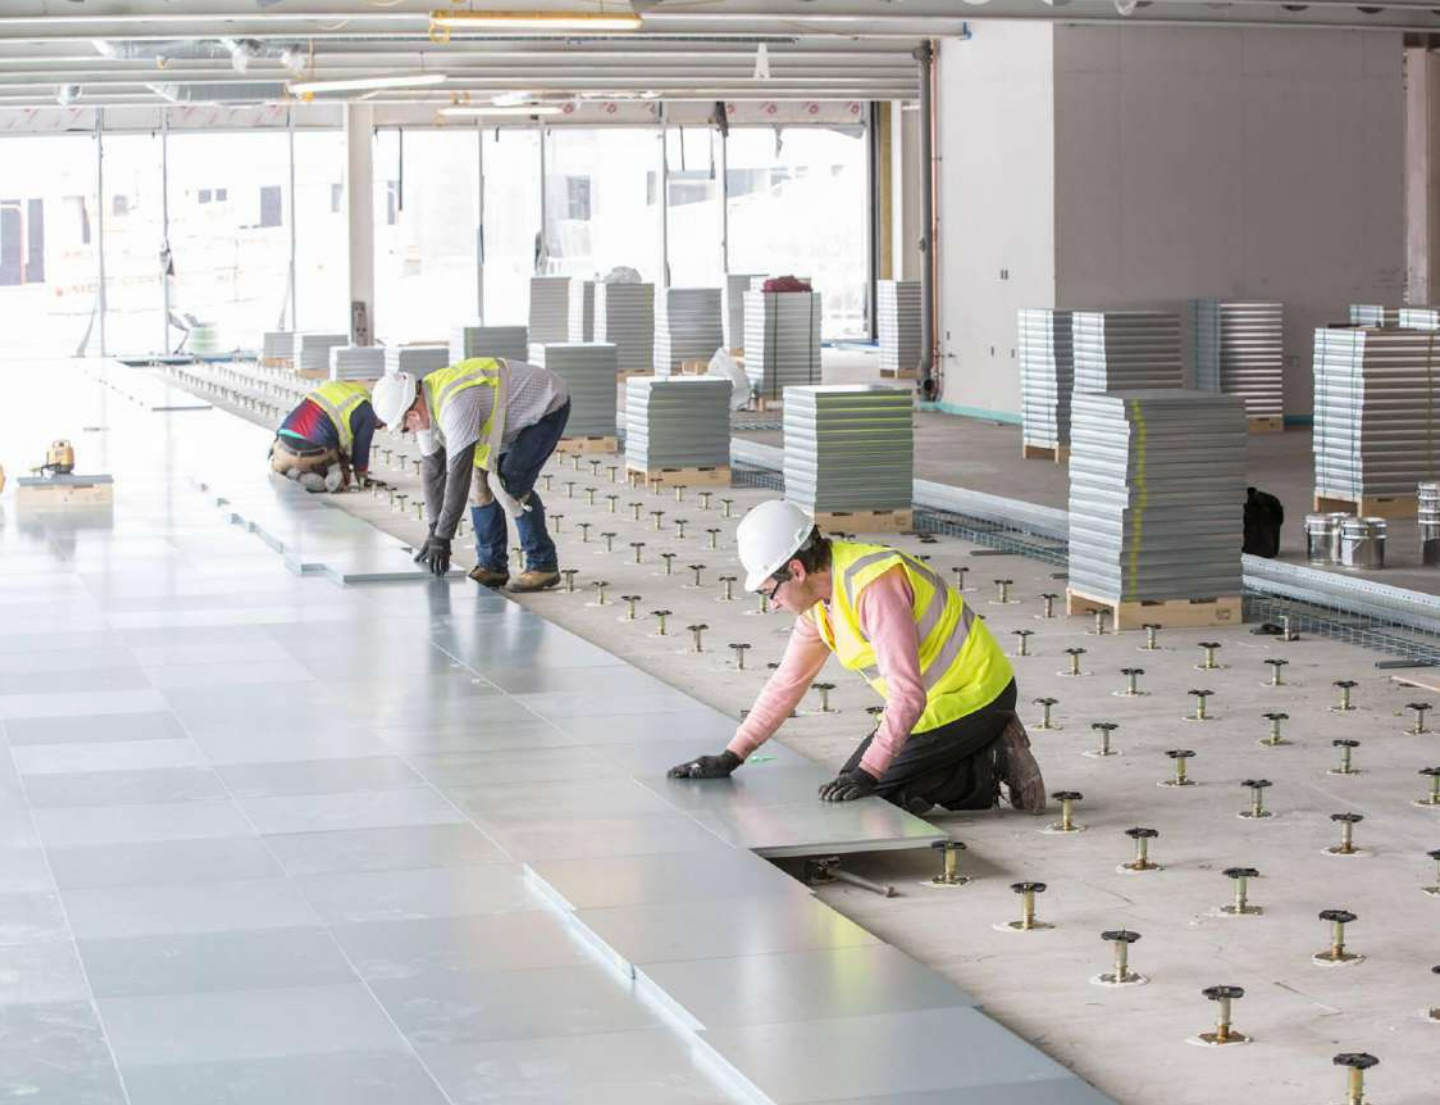

Flooring Coating Systems.

- Epoxy coat (Solvent-free, Hybrid combination of epoxy and polyurethane)
- Self-Levelling (Epoxy Self-level, Cementitious Self-level)
- Flooring screed (Epoxy screed, Cementitious screed)
- Protective polyurethane Traffic-Coat Systems.
- Highly decorative Flooring system (Epoxy-Based Terrazzo – Cementitious-Based Terrazzo – Polyurethane-Based Terrazzo)
- Highly decorative Flakes and Quartz Flooring System
- Highly decorative Pearlescent Metallic Epoxy Flooring system
- Microcement Flooring system
- Heavy-Duty Hygienic Cementitious Polyurethane Screed
- Anti-Static Flooring System (Epoxy – Polyurethane)
- MMA acrylic (Methyl Methacrylate (MMA)) catalyst flooring system.
- Road Marking Flooring system

We are **Taawon Pan Gulf Co. (TPG)** a Specialized Contracting Company, which provides the latest technology and a full system for Heat Insulation, Protective and Waterproof systems to protect your project.

Specialized Contracting Segment

Raised Floor
System Segment.

IPG

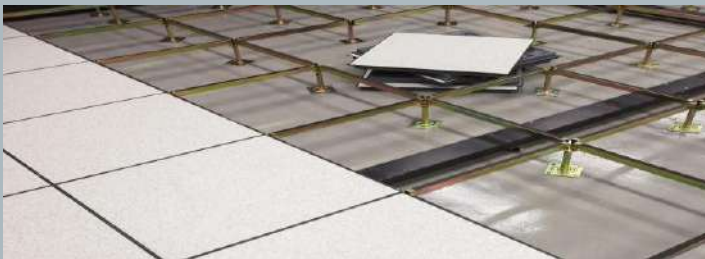

The Raised floor (Access Flooring product)

provides an elevated structural floor above a solid substrate, creating a hidden void for the passage of mechanical and electrical services.

The choice of the right strategy, based on the main users' needs and project requirements, can also significantly improve the overall performance of a project. There are so many types of The Raised floor (Access Flooring) System that can be utilized, but here is a brief list of typical applications and the main proposed materials and systems as below list:

The Raised floor – Flooring Systems .

- Steel Cementitious Access Floor Panel
- Woodcore Access Floor Panel
- Calcium Sulphate Access Floor Panel
- FRC Access Floor Panel
- Aluminum Access Floor Panel
- Perforated Access Floor Panel

We are **Taawon Pan Gulf Co. (TPG)** , a Specialized Contracting Company, which provides the latest technology and a full system for Heat Insulation, Protective, and Waterproof systems to protect your project.

Specialized Contracting Segment

Concrete Repair
System Segment.

IPG

Concrete Repair System Segment Sector.

Given the massive variety of concrete structures that surround us daily, which have many uses in our lives, we have to focus on these concrete structures by making repairs and maintaining them because of stress, loads, weather effects, corrosion, structural damage, water infiltration, seismic activity, and many other reasons that expose it.

The choice of the appropriate rehabilitation strategy, based on the root cause of concrete failure, can also significantly improve the overall performance of a structure. There are so many types of concrete repair that can be utilized, but here is a brief list of typical applications below:

Concrete Repair System

- Scope work of Cracks Repair & Dry/Wet Injection Concrete Repair
- Scope work of Grouting & Anchoring Concrete Repair
- Scope work of Strengthening Concrete Repair
- Scope work of Structural Reinforcement Concrete Repair

We are **Taawon Pan Gulf Co. (TPG)** Specialized Contracting Company, which provides the latest technology and a full system for concrete repair systems to protect your project.

Specialized Contracting Segment

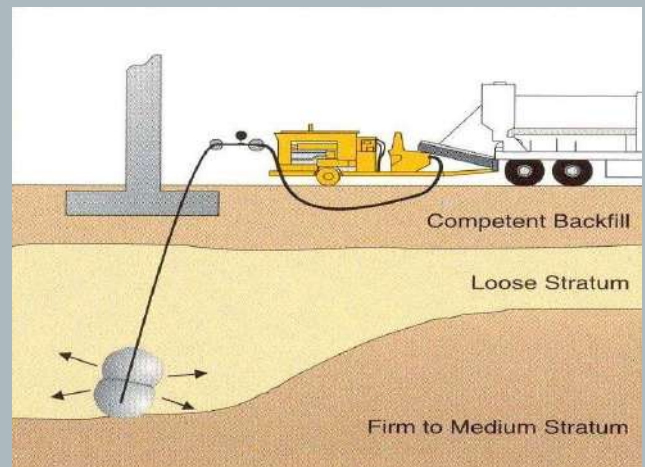

Soil Improvement
System Segment.

Soil Improvement System Segment Sector.

Soil improvement during construction involves various techniques to enhance the properties of the soil for better stability and support.

Compaction, soil stabilization with additives such as lime or cement, and soil reinforcement with geosynthetics or geogrids are commonly employed. These techniques aim to increase soil strength, reduce settlement, and mitigate the risks of foundation failure. Proper soil improvement not only ensures the structural integrity of the construction but also minimizes long-term maintenance costs.

Soil Injection (Grouting)

Soil grouting is one essential activity of soil treatment where slump under slabs is treated, villa yards, soil enhancement in coastal areas, filling cavities, which might arise under footings during cavity detection, and soil grouting of buildings before construction. The process involves drilling several boreholes to specific depths and diameters, then grouting the cement mortar under controlled pressure and, in some cases, adding chemicals to enhance concrete strength. Grouting is continued until cavities are filled, and in turn, we ensure that the grout is free of cavities and soil.

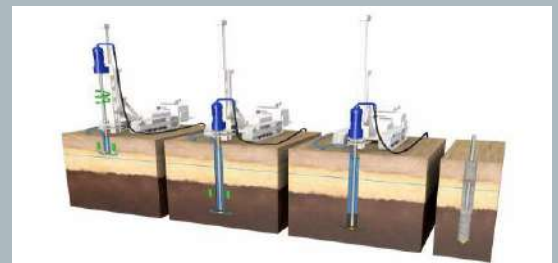

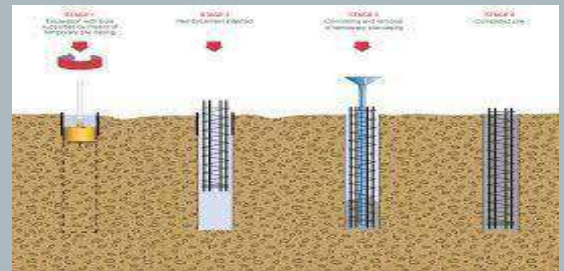

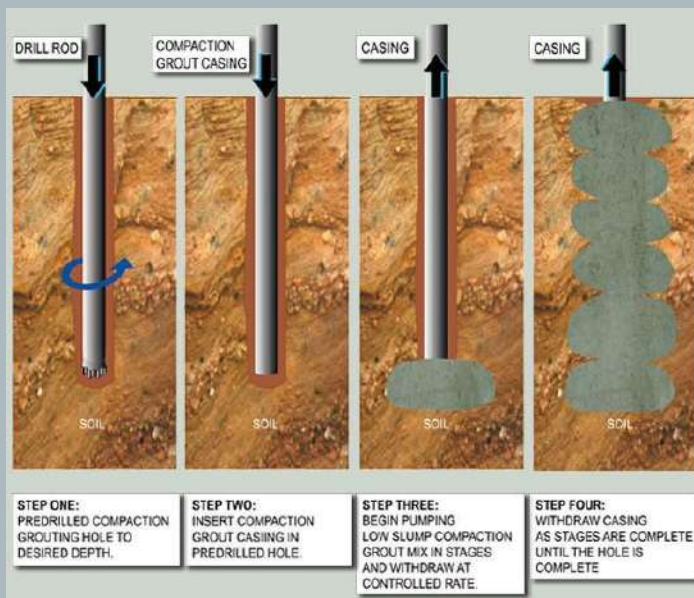

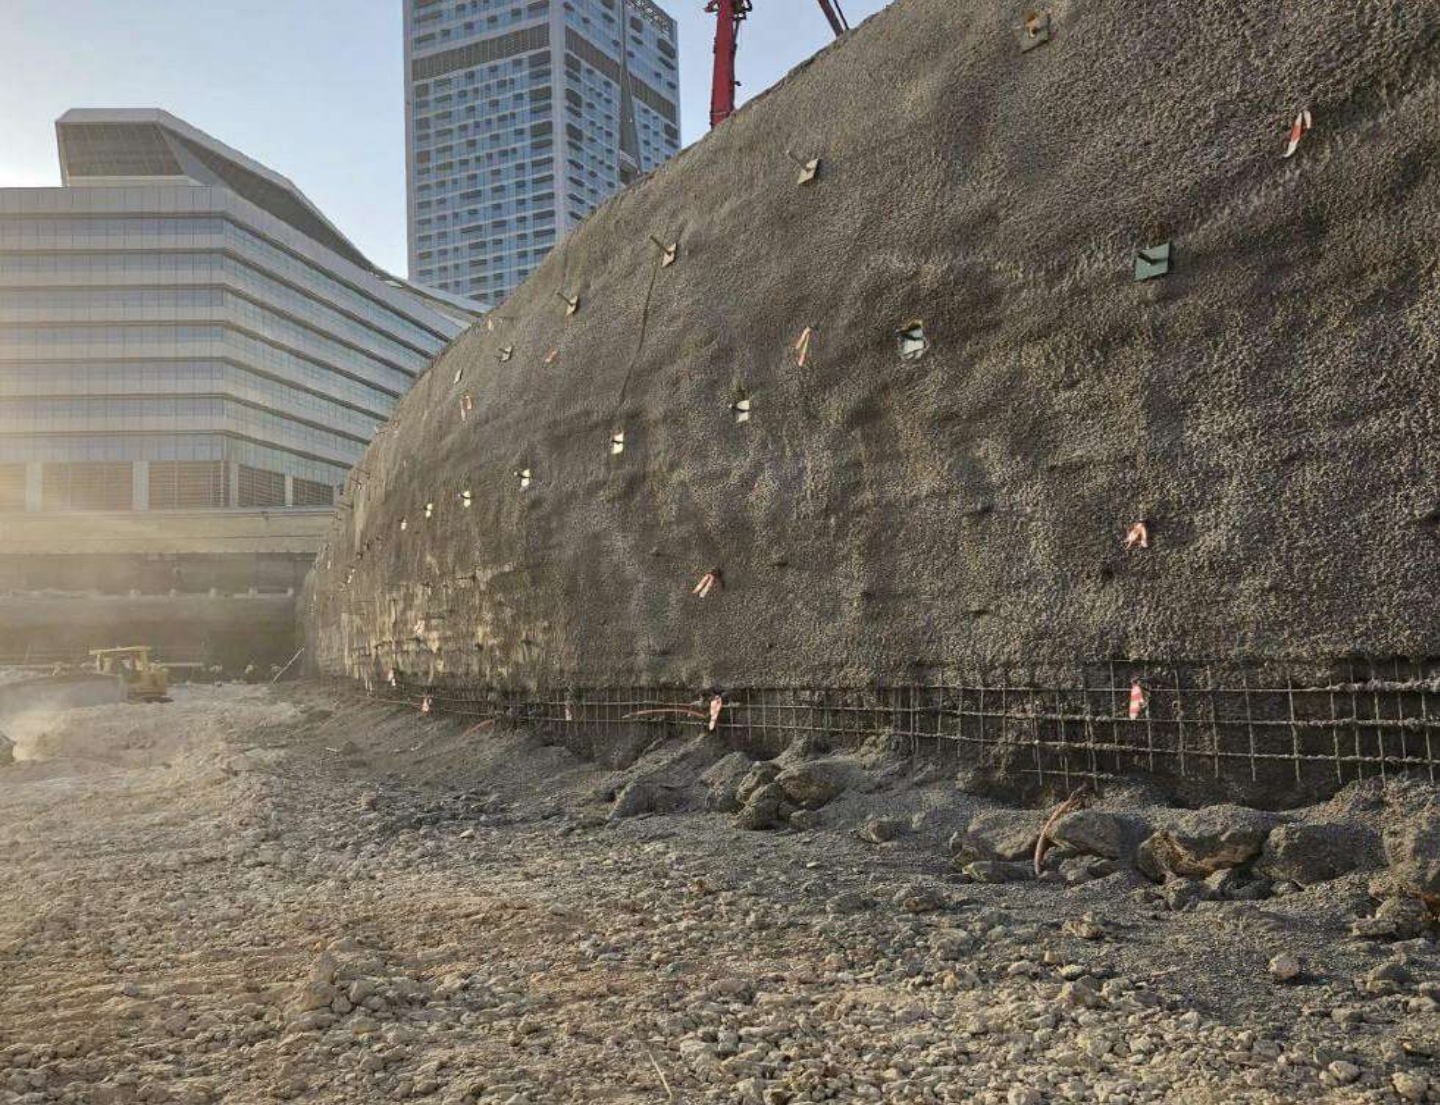

TPG Soil improvement System Segment Sector

Such micro piles have shapes, diameters, and depths that vary under building loads, soil, and foundation types.

Micro piles are as follows:

- Friction micro piles depend on soil friction with micropyle span if rock layers are unavailable.
- End-bearing micro piles, which depend on the transfer of loads to rock layers
- Friction and end-bearing micro piles, which gather the above- mentioned two types.

Specialized Contracting Segment

Shotcrete System
System Segment.

Shotcrete System Segment Sector.

Shotcrete can be wet or dry cement, and you can choose the right shotcrete mix to meet the requirements of your project. The mixture is then placed by spraying the structure into the desired location, whether a vertical or a horizontal one. This is possible due to the high spraying speed and the speed at which the material dries and solidifies.

Shotcrete can be tailored and enhanced through the use of admixtures. You can achieve it by wanting improved water resistance, a faster pumping rate, or a mix requiring only one-layer application.

The choice of the right strategy, based on the main users' needs and project requirements, can also significantly improve the overall performance of a project. There are so many types of Shotcreting System that can be utilized, but here is a brief list of typical applications and the main proposed materials and systems as below list:

The choice of the right strategy, based on the main users' needs and project requirements, can also significantly improve the overall performance of a project. There are so many types of Shotcreting System that can be utilized, but here is a brief list of typical applications and the main proposed materials and systems as below list:

Shotcrete System.

- Using Shotcreting as Concrete Repair system
- Stabilizing the Rocks walls
- Shoring and Nailing (Shotcrete – Anchor bolts)
- Shoring the swimming pools
- Tunnels construction

We are **Taawon Pan Gulf Co. (TPG)** Specialized Contracting Company, which provides the latest technology and a full system for Shotcreting System to protect your project

Specialized Contracting Segment

Fire-Rated
System Segment.

Fire-Rated System Segment Sector.

Fireproofing provides fire resistance to building materials and structures in refineries, petrochemical plants, power plants, process terminals, and many other places. During a fire in a building, the critical structures keep operating until the fire is controlled.

Fireproofing means applying certain products over the materials or structures to minimize and slow fire spread. Thus, it gives building users and firefighters more time and safer areas to act against and control fire.

Types of Fire-Rated Systems

Active Fireproofing

In the case of active fireproofing, human intervention is required to activate the fireproofing system.

Passive Fireproofing

In the case of passive fireproofing, it is planned and designed considering safety plans beforehand. The most common type of passive fireproofing is listed below:

**(Firestop Materials – Cementitious Fireproofing coating
– Intumescent Fireproofing coating)**

Passive Fire-Rated System.

Firestop Materials:

It is the containment of fire or smoke through rated assemblies by applying tested fire-rated assemblies. There are four primary types of openings or joints associated with fire and smoke-resistive-rated assemblies, to which tested fire-stopping systems may be used to prevent the spread of fire,

Cementitious Fireproofing coating:

These are gypsum-based, plaster-like coatings that look like white stucco when dried. They are sprayed on structural surfaces requiring fireproofing. Cementite fireproofing keeps structural girders and beams below 540 C, where the steel will bend.

Intumescent Fireproofing coating:

When heated, intumescent paints expand and form a heat-resistant barrier. They usually contain sodium silicates. Under high-heat conditions, the intumescent paint coating thickens, entraining air and creating a layer of improved insulation. Intumescent fireproofing paints are used on steel, metallic pipes, tanks, and valves.

We are **Taawon Pan Gulf Co. (TPG)** a Specialized Contracting Company, which provides the latest technology and a full system for Heat Insulation, Protective and Waterproof systems to protect your project.

Specialized Contracting Segment

Blasting & Painting Steel
System Segment.

IPG

Blasting & Painting Steel System Segment.

A coating or lining should be applied to protect surfaces from corrosion and ensure the integrity of steel and other metals. To ensure the success of this process and increase the coating's durability or lining, the steel substrate should first undergo surface preparation to remove contaminants and create suitable conditions.

The coating and lining systems vary from thin, highly sophisticated stoved linings with excellent and superior chemical and temperature resistance to conventional cold-cured coatings; the base of these materials is Epoxy, Urethane Elastomers, glass flake-filled and glass fiber/cloth-reinforced resin-based systems..

Specialized Contracting Segment

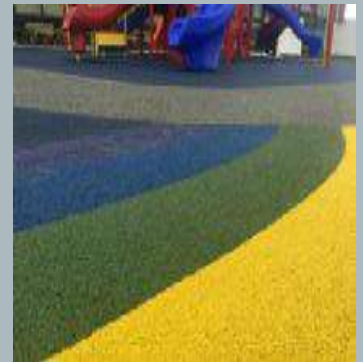

Sports & Comfort
Flooring

System Segment.

Sports & Comfort – Flooring Systems Segment Sector

Range of flooring products consisting of black granular (SBR) and polyurethane, which are highly flexible, EPDM granules and acrylic flooring systems suitable for floors indoor & outdoor Basketball courts, Handball courts, Volleyball courts, Tennis courts, Football courts, all multi-purpose courts, Cycling Track, Running Track, Courts for Tennis to be Certified and Approved by the International Tennis Federation (ITF), Horse stable, Jogging track, Walking ways, children's playground area And all playground area complies with Athletics Federations (IAAF) specification.

The choice of the right strategy, based on the main users' needs and project requirements, can also significantly improve the overall performance of a project. There are so many types of Sports and Safety Comfort Systems that can be utilized, but here is a brief list of typical applications and the main proposed materials and systems as follows:

Sports & Comfort – Flooring Systems.

- Artificial grass and Shockpad playground Flooring system
- Wooden Sport Flooring
- Cycling Track Flooring system
- Skating Park – skating Rink Flooring system
- Running track, jogging track, and walking track, Flooring system
- Multi-purpose court Flooring system (Acrylic – Polyurethane)
- Safety Tile Flooring Systems (Styrene Butadiene Rubber (SBR) – EPDM Granules – Freckled Rubber)
- The athletic track complies with the International Association of Athletics Federations (IAAF) 's flooring system standards.
- Running track, jogging track, and walking track, Flooring system

Sports & Comfort – Flooring Systems.

Acrylic Tennis courts comply with the International Tennis Federation (ITF) standards Flooring system.

 **ITF 1** indicates average game speed characteristics,
Which will be a tennis court for slow-speed play.

 **ITF 2** indicates average game speed characteristics,
Which will be a tennis court for slow-speed to
medium-speed play

 **ITF 3** indicates average game speed characteristics,
Which will be a tennis court for medium-speed play.

 **ITF 4** indicates average game speed characteristics,
Which will be a tennis court for high-speed play.

We are **Taawon Pan Gulf Co. (TPG)** A Specialized Contracting Company, which provides the latest technology and a full system for Sports & Comfort – Flooring Systems to protect your project.

Specialized Contracting Segment

General Play Equipment
System Segment.

General Play Equipment Systems

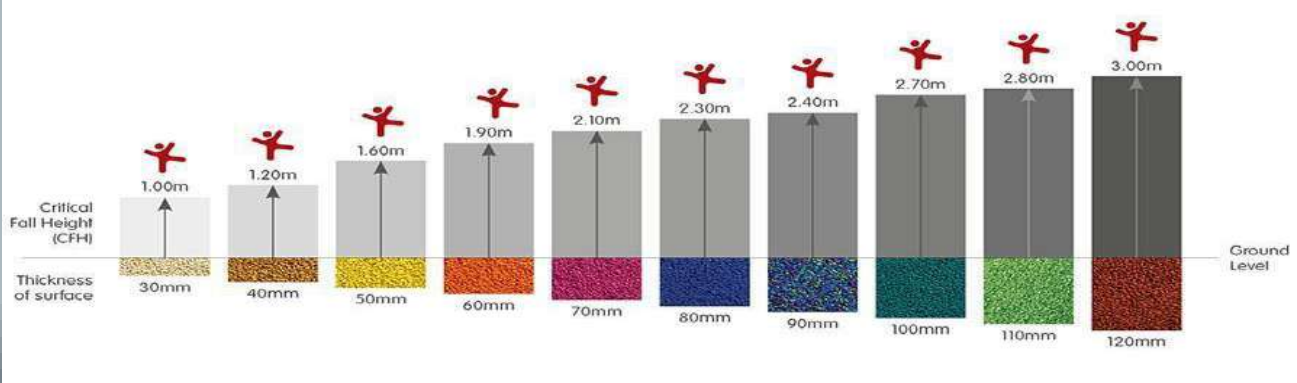

We are part of Taawon Pan Gulf Co. (TPG), a specialist in supplying and applying all types of play equipment tailored to the user's age group and those with disabilities. Our products comply with international standards EN 1176. The high quality and durability of our products result from our rigorous qualification of suppliers and careful selection of materials, including glue-laminated timber, powder-coated steel, stainless steel, HDPE, and HPL panels.

We are partners with the largest manufacturers of this type of equipment, based in numerous countries, including France, Spain, the United Arab Emirates, the United States of America, the United Kingdom, Poland, China, and Turkey.

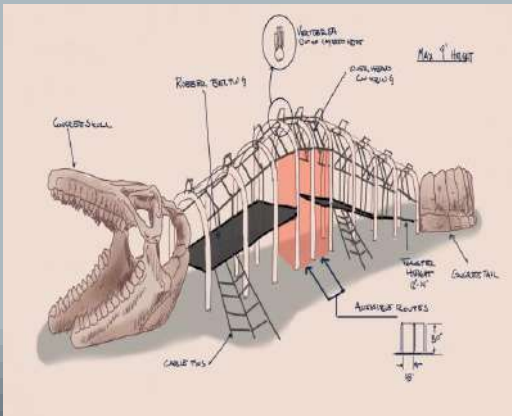

BS EN 1177:2018 - Critical Fall Height			
Nominal Thickness	Measured Thickness	Critical Fall Height	G-Max Value
(MM)	(MM)	(M)	
20	20	0.7	226
40	40	1.1	186
50	50	1.41	169
60	60	1.57	161
70	70	1.86	153
80	78	2	147
90	88	2.27	143
100	100	2.39	139
110	110	2.4	134
120	120	2.58	129
130	128	2.84	125
140	140	> 3.00	121

A part of our scope is to execute the safety ground layer for the play equipment. This layer thickness must comply with BS EN 1177:2018 standard for the Critical Fall Height for this equipment, as shown in the table and chart below.

TPG General Play Equipment Systems Segment

We are **Taawon Pan Gulf Co. (TPG)**, a specialized contracting company that provides the latest technology and a comprehensive system for the General Play Equipment System to protect your project.

Specialized Contracting Segment

Sports Equipment
System Segment.

Sports Equipment

We are in **Taawon Pan Gulf Co (TPG)** a specialist in supplying and applying all types of Sports Equipment that meet our client's expectations and requirements and comply with your project design and international standards.

Sports Equipment comes in many types, as follows:

- Approved sports seat According to FIFA/UEFA indications, it is Suitable for indoor and outdoor sports venues.
- According to FIFA/UEFA indications, outdoor team shelters are Suitable for indoor and outdoor sports venues.
- Anti-vandal outdoor and indoor sports equipment for all types of sports games based on project requirements

Sports Equipment comes in many types, as follows:

- Extendable tunnel to access fixed system (indoor and outdoor) game fields or telescopic collection. Available in various measures and systems according to the specific needs of each space, based on project requirements.
- locker room equipment
- Electronic scoreboard with different numbers of digits based on project requirements formed by high-light

Specialized Contracting Segment

Padel Tennis Court
System Segment.

Padel Tennis Court

We are in **Taawon Pan Gulf Co. (TPG)**, a specialist in supplying and applying all types of Padel Tennis Courts that meet our clients' expectations and requirements.

Padel (also called 'paddle' or 'padel tennis court') is what you get when you combine the best elements of Tennis & squash and disregard the annoying aspects of these sports.

It can be played in doubles teams. After the playball bounces off the floor, it can touch the surrounding walls, it follows the same rules as Tennis. It can be played with mixed couples. It can be played indoors, outdoors, and at all hours of the day since the installation includes eight lighting posts to prevent shadows.

Padel tennis court comes in two types based on installation:

Padel tennis court with Artificial Turf floor

The Padel tennis court with Artificial Turf floor ranges is highly resistant to extreme cold and hot weather. Through continuous collaboration with specialized partners in this field, our teams of experts work endlessly to attend to the crucial queries of the clients.

Padel tennis court with acrylic floor

The Padel tennis court's acrylic floors are highly anti-slip, all-weather compatible, and UV resistant. Acrylic surfaces' advantages include maximum performance and optimal playing comfort, as per the surface's design for athletes.

Specialized Contracting Segment

Urban Street Furniture
Outdoor Fitness
System Segment.

Urban Street Furniture

We are in **Taawon Pan Gulf Co. (TPG)**, a specialist in supplying and applying all types of Street furniture that meet our clients' expectations and requirements.

That gives them a place to relax and makes the city even more beautiful because of its design. Our street furniture will decorate and delight parks, squares, streets, and sports fields in all countries where our team works.

We had a variety of Street furniture, including seating, Waste Receptacles, Planters, Tree Guards, Bike Racks, Bollards, and Arbors.

Outdoor Fitness Equipment

We are part of Taawon Pan Gulf Co. (TPG), a specialist in supplying and applying all types of outdoor fitness equipment tailored to users' age groups and those with disabilities. Physical activity in public spaces is for everyone. They need quality outdoor sports equipment. Based on that, we supply and apply this equipment to meet our clients' project designs and needs.

We are partners with the largest manufacturers of outdoor fitness equipment and Street furniture, based in numerous countries, including France, Spain, the United Arab Emirates, the United States of America, the United Kingdom, Poland, China, and Turkey.

PMCM's Review & Comments

Following to the comments in MAT Ref KSP-FSA-GMQ-CMT-ARC-MAT-0095-0034, the material is approved as noted, subject to the following conditions and recommendations: 1- Compliance with BS EN 1542 confirmed, aligns with BS 8204-1 bonded screed principles subject to bay layout and ISCR checks 2- Color & Slip Resistance: Submit topcoat details (Nitoflor FC or equivalent) with the top coat and slip resistance classification. 3- Method Statement: Update with multi-layer build-up procedure meeting BS EN 1542 and aligning with BS 8204-1 bonded screed principles, primer reapplication rules, bay pouring strategy, and ITP submittal, QC checks for interlayer bonding. 4- Mock-Up: Execute and obtain approval of a full-scale mock-up with adhesion and drop-hammer/pull-off tests prior to production works 5- Provide mitigation measures for the potential risks due to the multi layer application included but not limited to Cold joints if layers are applied after full cure without proper surface prep. Delamination if bonding between layers is not achieved. Uneven curing leading to weak zones. 6- Warranty - Obtain manufacturer warranty aligned with requirement in clause 1.9 ARC specification or approved deviation. 7- Compatible proof between the epoxy screed with the top coat is required. 8- The material mentioned in subject is NITOFLOOR TF1000 and in data sheet is NITOFLOOR TF10000 please clarify and correct the mistake.

1	ORMS	Page 4 / Scope of Work	The subcontractor's scope of work is limited to serving as the applicator for concrete repair works. This scope does not include pre-qualification as a material supplier. Accordingly, the subcontractor's pre-qualification approval pertains solely to their role as an applicator and does not constitute approval or guarantee of any materials they may propose to supply. In addition, a clear scope of work need to be provided from CHC.		The subcontractor's scope of work for Taawon Pan Gulf Company (TPG) is Concrete Repairing Works (Grouting & Anchoring, Strengthening Concrete Repair, Structural Reinforcement, and Carbon-fiber reinforced polymer (CFRP) based on the design drawing. We included all Authorized Applicator letters for Taawon Pan Gulf Company (TPG) that they Authorized to Supply & Application the all approved material system Concrete Repairing Works based on the design drawing Refer to Pages (17-28) .
2	ORMS	Page 1, 4 / Document Title & Scope of Work	The submitted Prequalification Document (PQD) for subcontractor Taawon Pan Gulf (TPG) is titled "Prequalification for Concrete Repairing Works", which indicates that the scope is limited to concrete repair activities. However, the scope of work description within the document also includes: B. Protective, Waterproofing, and Roofing Systems C. Fireproofing Application Systems This inconsistency between the document title and the actual scope of work described must be addressed. CHC is required to ensure that the quality of the submission is maintained, and that there is clear alignment between the document title and the scope of work content. Please, Clarify the submission include this works ?		The scope of work in the project is Concrete Repairing Works (Grouting & Anchoring, Strengthening Concrete Repair, Structural Reinforcement, and Carbon-fiber reinforced polymer (CFRP)), based on the design drawing. Refer to Pages (29) .
3	ORMS	General	Throughout the Subcontractor period and at any time, SSC and/or KAFD may request CHC to submit a copy of any valid Company Certificate, any Insurance Certificate and Warranty Certificate compliant with the Contract.		We included all Authorized Applicator letters for Taawon Pan Gulf Company (TPG) regarding (Protective Waterproofing, Roofing Systems, and Fireproofing Application Systems) . It will be defined in a separate prequalification document.
